

Jason Emory, PhD
Assistant Professor of Chemistry
Pfeiffer University

Dr. Jason M. Emory is an assistant professor of chemistry and chair of the natural sciences department at Pfeiffer University. He grew up in North Carolina and earned my BS and MS in Chemistry from UNC Charlotte. He then went to Louisiana State University to earn a PhD in chemistry in 2010 studying field portable devices for molecular diagnostics and homeland security threats. He then went to Colorado State University as a postdoc to research water quality by developing microfluidic devices in conjunction with the Army corps of Engineers for field analysis of perchlorate in ground and surface waters. He joined Pfeiffer University in the fall of 2014. And has continued to research and develop microfluidic devices for field measurements and analysis of water quality issues.
