

Paul Murray P.Eng

Product Manager – Pipe Condition Assessment

Muller Company - Echologics

pmurray@echologics.com

Paul Murray has over 10 years of water industry focused on condition assessment and asset monitoring. Paul has managed Echologics largest condition assessment and leak detection programs. He also was a key member of the team that tested the first remote transmission pipe leak detection system & adapted it for use in water networks worldwide. Paul's main interest is developing innovative approaches for water infrastructure asset management.

Echologics is dedicated to solving the urgent problems of communities associated with water management. We create technology that enables utilities to better understand their water networks, empowering them to manage water flows and infrastructure more effectively.

Outside the office Paul is a runner and wilderness paddler.
